Patient Satisfaction Survey Results 2018

With regards to your prostate cancer do you feel that your needs are being met?

92% - Yes 

It was good to speak to someone at my 6 monthly review

Very impressed with speed of result-blood test on Friday. Result received in post on Tuesday. Thank you.

I had blood sample taken at GP's on 13/4/18-received ok Result 17/4/18. Unbeatable service. I have had superb service from day 1. Thank you.

Seems a good system particularly as GP has a drop in blood testing service.

Nothing to add. Care and service as good as private healthcare. thank you.

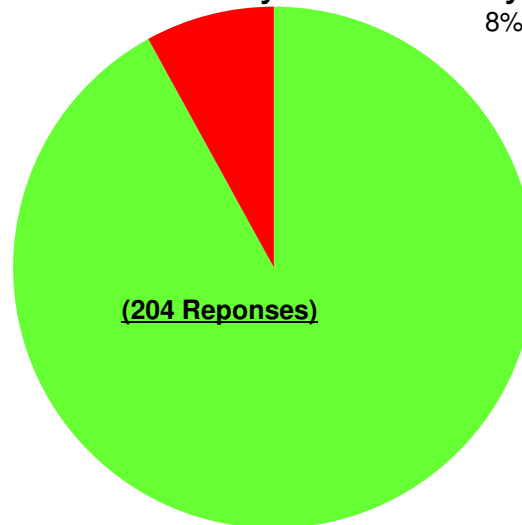

I think the service is good as I found out recently when I missed a blood test! Thanks for the prompt! It would be nice to know what the PSA level was on the result. Thank you

8% - No 

Send out the results. I feel 100% abandoned in the system

Would like to go back to hospital system. Does not work using Station View Health Clinic

I have not received any information regarding this service

In addition....
