5 THINGS ABOUT ME

Emily Robertson
Ward Sister, Older Peoples Care
Manchester Royal Infirmary
Manchester University Foundation Trust
The Patient....
The Person....
“Who are you and what matters to you?”

(Dewar & Nolan 2013)
Local Problem Analysis

A Baseline audit of the person centred information present in notes and at the bedside was carried out in Ward 45, it showed that this information is limited.

LITERATURE REVIEW

Knowledge of the person is a key prerequisite for person centred care (McCormack and McCance 2017).

Life Story Work (LSW) is possible in a hospital environment (Clarke et al 2003).

To be successful LSW needs managerial and family support and a good technological solution to aid completion and accessibility (Elfrink et al 2018, Wills and Day 2008, McKeown et al 2010, Gammonley et al 2015).
TO MAKE CARE FOR OLDER PEOPLE IN HOSPITAL MORE PERSONALISED AND RELATIONSHIP CENTRED BY USING A PERSON CENTRED "PROFILE," STORED ELECTRONICALLY TO HELP CLINICAL STAFF GET TO KNOW THE PEOPLE THEY CARE FOR BETTER AS INDIVIDUALS.
#5ThingsAboutMe

We would like to get to know you better because this will help us to look after you better. If we know What Matters most to you then together we can make it our top priority when we plan your care.

We would like to know 5 Things About You, this can be who or what you love, what you are most proud of, what you are most worried about or anything else you would like us to know about you. You may want to include some of your thoughts about the future or any decisions you have made about your future care. If you wish you may want to share other things about yourself that are completely unrelated to your health. Sometimes sharing pictures or videos can be a good way of getting to know a person better, so if you would like to share any, we would love to see them. Please include as much or as little detail as you wish, this is your document. Once you have written your “5 Things About Me,” with your consent we will upload this to your Electronic Health Record so that staff who are looking after you can use it to get to know you and what matters to you most.

Thank You for Your Support
5 Things About Me
- I am a dancer and was in showbusiness all my adult life meaning I travelled a lot.
- I went to Art College and especially love painting, I love bright colours.
- I had a bright red motorbike for years and used to love riding everywhere on it.
- I am an animal lover and have a cat called Misty at home who I miss very much, I worry what will happen to her in the future.
- I love my home and am looking forward to going home to my cat.
During the project period 71.1% of the people admitted to the ward had a profile completed. The staff reported aggregate score across four constructs of the Person Centred Practice Inventory increased by 68.7% after participating in the intervention or accessing the profiles.
STAKEHOLDER ENGAGEMENT KEY

The strength of the work came from the ward team who supported it through their hard work and passion to make care more person centred.

A BETTER IT SOLUTION IS NEEDED

A better IT application would have been helpful in terms of efficiency and made the finished product more accessible to staff in all areas.

LED BY THE PERSON

The aim of the project was that the person accessing care’s voice was heard more clearly so this work should be led by them and not the staff, as such it should be promoted to them and whether there are people who want to prepare this and bring it into hospital should be explored.
SUSTAINABILITY AND SPREAD

5 things about me

How well do you know the person you are caring for?

@ThingsAboutMe

In order to be able to personalise the care we offer, we need to know the people we care for and the experiences of the older people and their families. This has been supported by people we have worked with who have been involved with elderly care and the experiences of the older people and their families. We are always looking for new ways to present the project and to publicise the idea.

Present the project locally

Write up for publication

Use social media to publicise the idea

Present to a wider audience
